**Hiring Manager**  
**Oracle India**

Dear Hiring Manager,

I am writing to express my interest in the Student/Intern position at Oracle. I am currently pursuing a B.Tech in Computer Science with specialization AI/ML from Manipal University Jaipur. Through various academic and personal projects, I have built a solid foundation in Web development, machine learning, and problem-solving. Oracle's culture of innovation, scale, and impact aligns with my career goals. I am excited about the chance to learn and contribute.

During my studies, I have made projects like Deepfake Image Detection using Transfer Learning, Fake News Detection using BERT, and worked on several React and Node.js applications including an Event Management System, Persona-ChatBot. These experiences strengthened my skills in programming with JavaScript, using frameworks like React and Node.js, as well as working with databases such as SQL, MongoDB. I am also familiar with industry practices like Git, REST APIs, teamwork, and writing clean, optimized code.

I am a fast learner, disciplined, and comfortable taking ownership of tasks. I enjoy solving real-world problems and improving myself. I believe that an internship at Oracle will help me grow both technically and professionally while allowing me to contribute meaningfully to ongoing projects.

Thank you for considering my application. I would welcome the opportunity to discuss how my skills and enthusiasm can support Oracle's mission.

Sincerely,  
Abhay Sharma
